TESLA DEV PROJECTS

In addition to my regular **Tesla Property and Title** work duties, I taught myself to code to build tools to automate some of our more repetitive tasks.

STAMP CHAMP

<https://stamp-champ.mtndrew.now.sh/>

<https://github.com/Mtn-Drew/stamp-champ>

<https://github.com/Mtn-Drew/stamp-api>

Full stack web app, designed as a replacement for and update to QUICKNOTES/Auto Text. Built with React, Node and PostgreSQL.

QUICKNOTES

Maintained department Chrome extension QUICKNOTES, including updating, adding functionality, and publishing to the Chrome web store. QN is written in Javascript, HTML, and CSS.

CONTRACT REASSIGNMENT TOOL

Built in VBA, this tool generates case notes, writes standardized emails, and generates contracts for the Property & Title team at Tesla.

WORK HISTORY

TESLA / SR AGENT, PROPERTY AND TITLE

DECEMBER 2017 – PRESENT

Build and updated software tools for the Property and Title team, in addition to the regular P&T Senior Agent responsibilities of writing contracts, negotiating with stakeholders, and managing a large case load. Received raises and bonuses for exceeding performance expectations.

SOLARCITY / CONTRACT REASSIGNMENT, INTERCONNECT, SOLAR CONCIERGE

NOVEMBER 2015 – DECEMBER 2017

Worked my way up through Interconnection, Concierge, and finally Contract Reassignment. In CR, I project managed the transfer of solar contracts from home seller to home buyer. I interfaced with sellers, buyers, real estate agents, title and lenders. The position required heavy phone and email communication.
